EXPANDED ACADEMIC OPPORTUNITIES

In addition to the standard curriculum, Concordia has many special programs to fit individual preferences and needs. Many of these may be incorporated into your regular course of study. Some involve travel; others are work experiences. For those programs not located on campus, application and review may be required.

These academic opportunities will add depth to your academic program and enrich your life in many ways. Not only will they open new doors, deepen your understanding, broaden your perspective, and reveal capabilities you did not know you had, but they also will be an important part of a liberal arts education. We encourage you to explore these opportunities.
